

500X

THE
SIDE
OF
BEAUTY

The strength of beauty: 500X is the crossover that combines style and substance, ready to rule all roads with that something extra that makes it unique. Its two souls, metropolitan and crossover, meet the tastes and needs of all, offering satisfaction at the wheel, technology and exceptional safety.

The **500X** expresses the values that made the 500 an icon recognised all over the world.

In the 500X, the seduction of Italian design is made complete with the solidity of a car which is comfortable, high-performance and always connected to the world.

A man in a dark suit and tie is adjusting his tie. He is looking slightly to the left with a serious expression. The background is dark with out-of-focus lights in various colors (yellow, blue, white), creating a bokeh effect. The overall mood is sophisticated and mysterious.

CHARM and AUDACITY

----- 500X CROSS • CROSS PLUS

These two trim levels demonstrate the 500X's more adventurous and content-rich soul. This is the ideal equation for those looking for the strong and distinctive appearance of a true crossover, but who don't accept compromise when adventure calls.

The 500X Cross and Cross Plus are available with 4x2 combined with the Traction+ system. They are characterised by off-road-look bumpers with protective shields, rims with specific design, exterior details with satin-chrome finish and roof rails.

Cross Plus model shown

CLASS and PERSONALITY

o----- 500X • POP STAR

It takes talent to get yourself noticed in style on the city streets. The versions with a metropolitan mood have the right outfit to do just that, thanks to styling of the bumpers that enhances the body colour and to the chrome style details that highlight the quality.

Pop Star model shown

Cross Plus model shown

TREME

DRIVES

The 500X behaves like a crossover in a higher class, thanks to its enviable balance of handling, stability and satisfaction at the wheel, courtesy of the MacPherson independent rear suspension.

The 500X is available in two different drive types, 4x2 (Pop Star) and 4x2 with Traction+ (Cross/Cross Plus).

4x2 TRACTION+

The Traction+ system, combined with the 4x2 engine on the Cross and Cross Plus models, is an electronic traction control system that ensures optimal torque distribution on the front axles, allowing the car to tackle low-grip surfaces more efficiently.

Sport Traction

500X
POP STAR

Auto

Sport All-weather

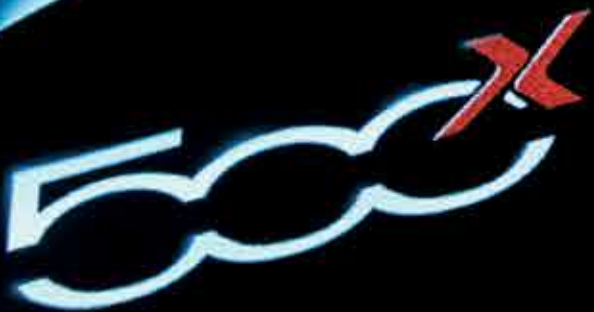

The Drive Mood Selector allows the driver to select, through the control on the central tunnel, one of the three available “moods” that optimise driving dynamics, altering the behaviour of the car. It comes as standard on the Pop Star, Cross and Cross Plus versions.

CITING

----- ENGINES

The engine range of the 500X offers a 1.6 E-torq 81 kW engine and a 1.4 Turbo MultiAir II 103kW engine. The 1.6 E-torq has a 5-speed manual transmission and the 1.4 MultiAir comes in a 6-speed manual or 6-speed Dual Dry Clutch Transmission (DDCT). All engines comply with Euro 6 standards and the 1.4 MultiAir comes standard with Start & Stop for outstanding performance and efficient fuel consumption and CO₂ emissions.

TRAORDINARY

----- SAFETY

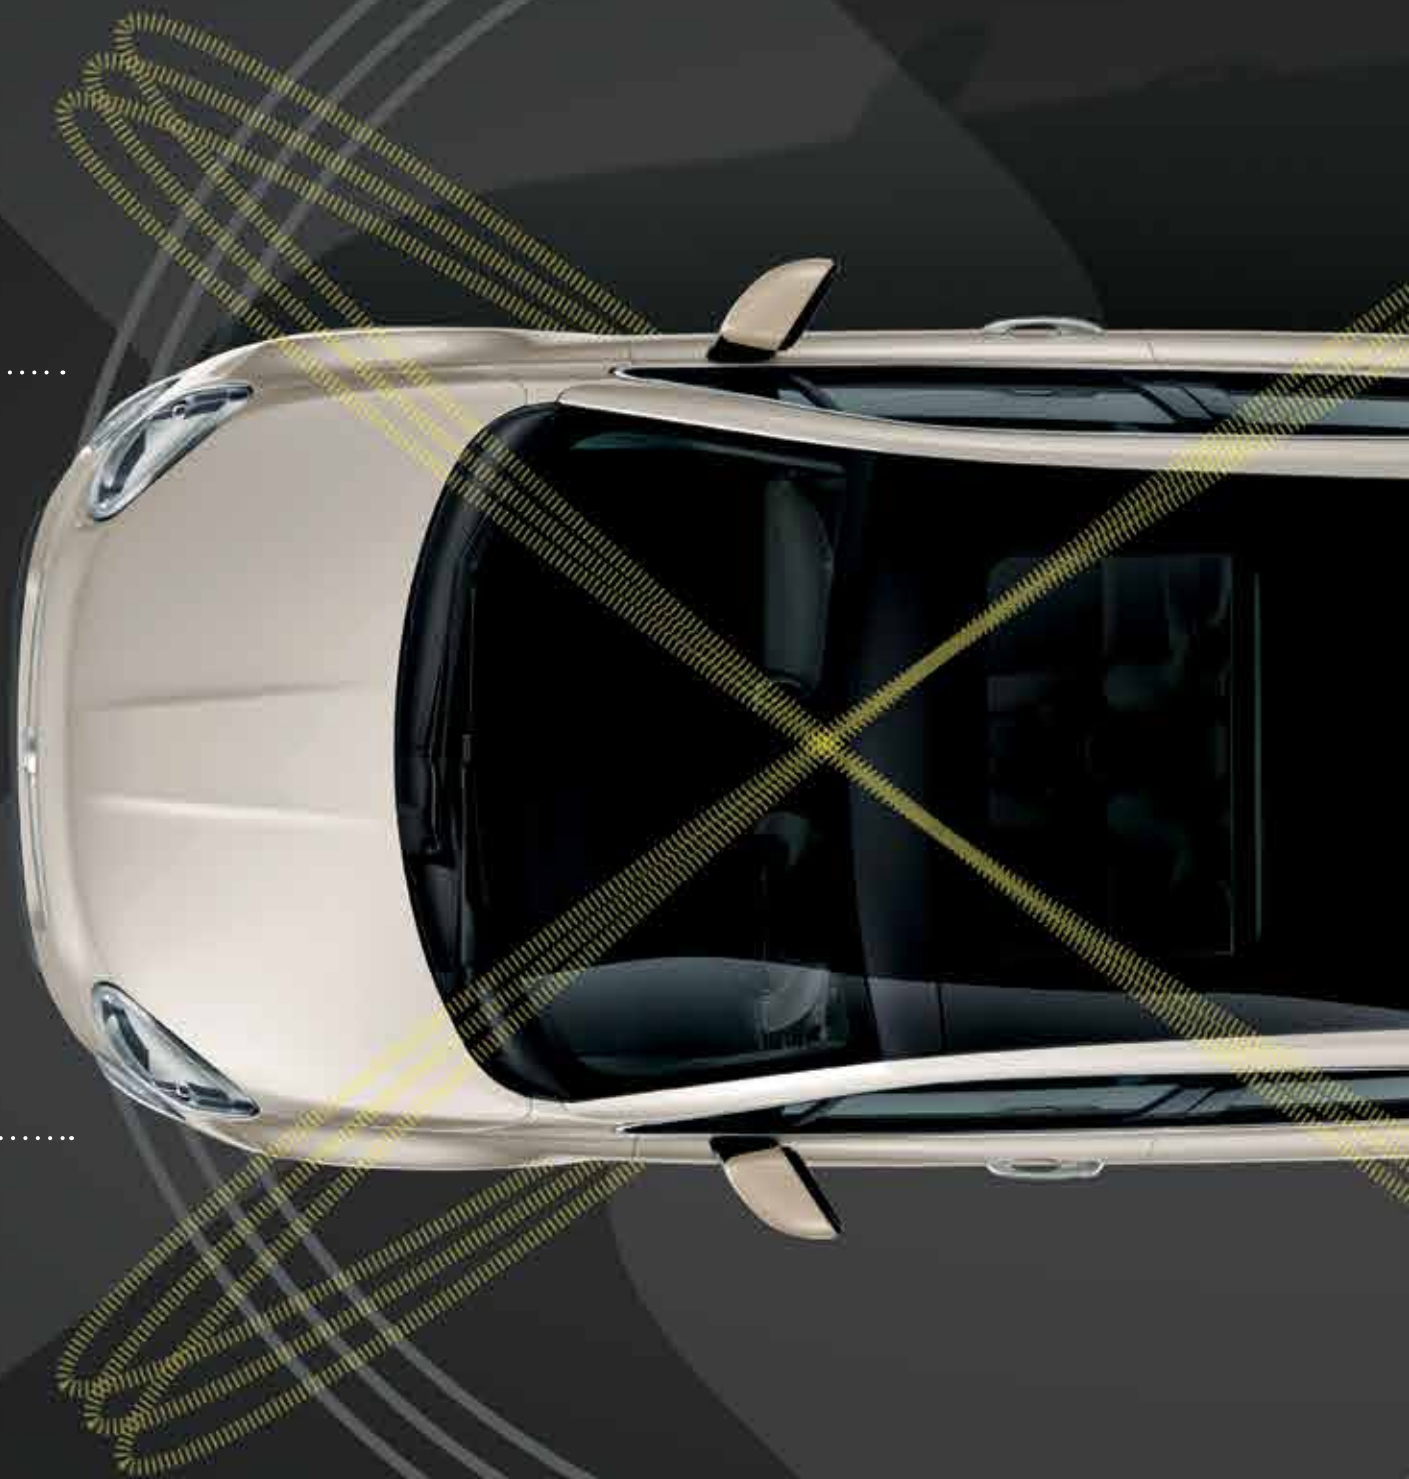

With the 500X you can enjoy every journey in complete peace of mind thanks to the wealth of safety equipment, which includes 6 airbags and the ESC system as standard on the Pop Star, Cross and Cross Plus versions. Maximum protection, minimum stress for an exceptional driving experience.

* BRAKE CONTROL

ELECTRIC PARKING BRAKE

* BLIND SPOT ASSIST

..... LANE ASSIST*

..... REAR CAMERA*

..... REAR PARKING SENSORS

Brake Control

Advises the driver if it detects, via the radar and video sensors, too great a difference in speed between the 500X and the vehicle in front and consequently the risk of a collision. Should the driver not intervene, the system automatically activates braking to avoid the impact or mitigate its effects.

Blind Spot Assist

Monitors the presence of vehicles in "blind spots" and advises the driver through a light signal on the door mirrors. Includes a function that advises the driver, when reversing, of the approach of a vehicle from the side.

Lane Assist

Advises the driver when they change lane involuntarily (without using the direction indicators). The visual indication on the instrument panel is accompanied by greater resistance of the steering to the change in direction.

* Optional

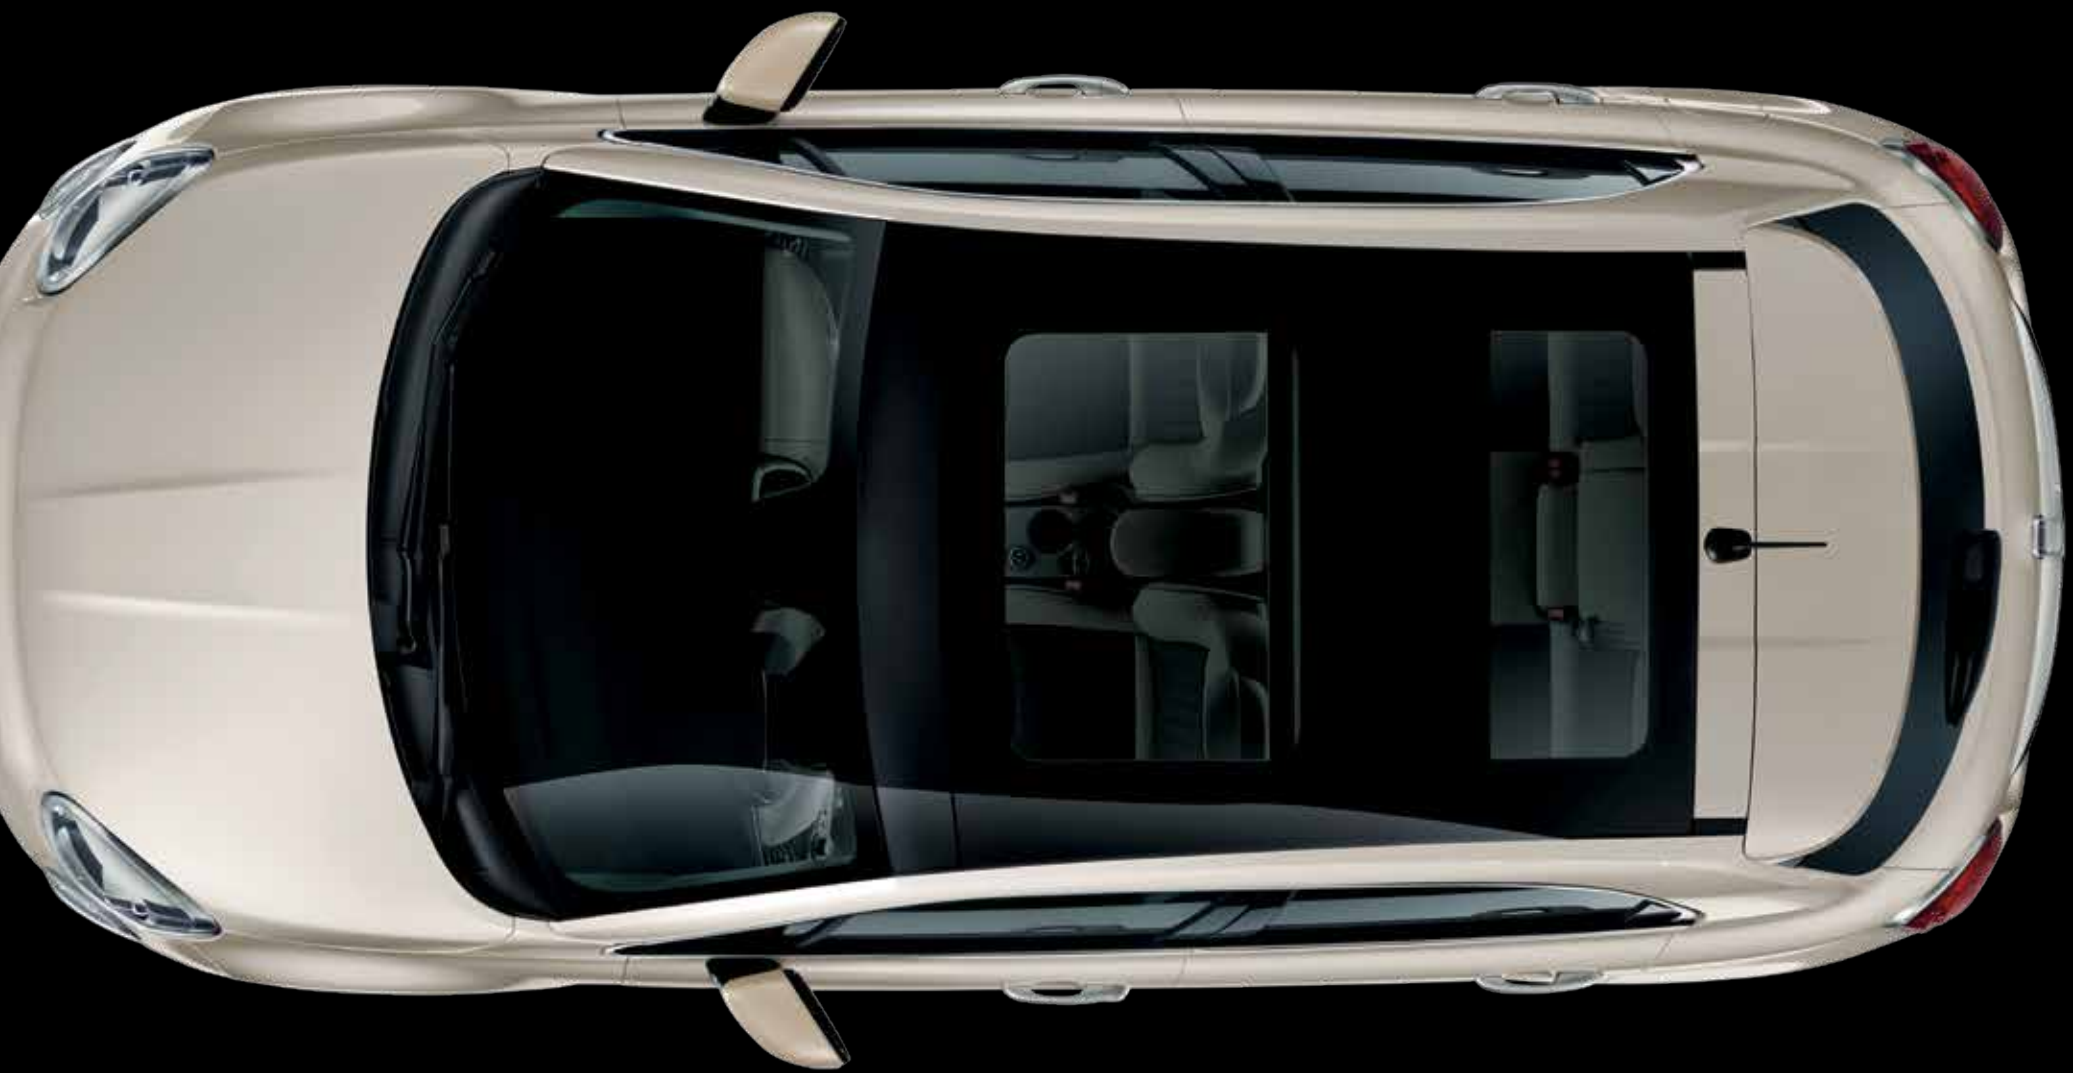

TROVERTED

----- INFOTAINMENT

The 500X has a touch-screen UConnect™ system with Bluetooth® and voice recognition.

Right Hand Drive version available in South Africa.

Large glass roof with electric opening (optional).
