

ALL NEW JEEP® COMPASS

The image features the Jeep logo centered within a circular border composed of short, white, dashed lines. The background is solid black.

**Jeep**<sup>®</sup>

# SET YOUR OWN COURSE.

Urban Explorers can make their own maps. The all-new Jeep® Compass, with segment exclusive powertrains, safety and technological features, now makes every road a possibility. Whether it's faced with the realities of the concrete jungle or the tests of the trail, the versatility of the most capable compact SUV carves its own path.

## THERE IS A NEW LINE ON THE HORIZON.

The unmistakable Jeep® Compass expression glares through the black gloss and chrome inlaid seven-slot grille set in the middle of the imposing wide stance, which allows for great off-road durability and a tighter, stiffer feel for better handling and response on the road.

Whilst Compass stays true to the classic Jeep® look with trapezoidal wheel arches, the LED rear tail lights give an aggressive signature. The all-round daylight opening and the gloss black roof convey a touch of contemporary sophistication. Together with its exceptional on-road driving dynamics and 4X4 capabilities, this combination sets the Jeep® Compass above the rest. Whether navigating the city streets or taking the road less travelled, the rugged Jeep® Compass frame, together with McPherson suspensions and a state of the art damping system, allows for a smooth, enjoyable ride.

## INSIDE-OUT SATISFACTION.

The Jeep® Compass makes sure that no matter where you go you'll get there with style, comfort and on your own terms. It stays true to the signature character of Jeep®, by offering sculpted materials, state-of-the-art technology and connectivity.

The trapezoidal centre stack bezel, gloss back trim and soft touch details naturally refine the Jeep® design of the interior that has purposefully placed everything at your fingertips.

Its leather-wrapped steering wheel with controls is linked to both the Uconnect™ display and the available 7" colour driver information display, making driving and staying connected smooth and natural. **The dual pane sunroof** is symbolic of the Jeep® open-air attitude, combining the beauty from the outside to the comfort of amply padded ergonomically designed seats.

Jeep® knows that life can be a handful, and with the available Power Liftgate, Jeep® Compass offers that extra convenience in making storage and organization easier.

Works with  
Apple CarPlay

Uconnect™

## HANDS ON TO BE HANDS FREE.

The interactive fourth-generation Uconnect™ available with up to 8.4" HD capacitive touchscreen, means you never have to take your eyes off the path ahead, executing every touch, pinch, voice command with precision. Maximise your smartphone with new available features on Uconnect™.

Apple CarPlay enables iPhone users to access Apple Maps, messages, phone and Apple Music through Siri voice control or Uconnect™ touchscreen.

Android Auto™ enables easy and safe access to handsfree voice control, Google Maps and Google Play Music via Uconnect™ touchscreen or steering-wheel controls.\*

Stay connected with Uconnect™ LIVE App giving access to TuneIn radios, Deezer music, Facebook Check In, Twitter, Reuters, Tom Tom Live with real time information on your journey, my:Car and eco:Drive™ to monitor vehicle status, your driving style and assist in reducing fuel consumption.

Uconnect™ LIVE lets you take your adventure to the next level with Jeep® Skills App: giving you information on Jeep® trails and performance with specific off-road gauges, measuring pitch, roll, pressure and altitude.

## POWER TO GO.

No one knows what is needed better than the driver, and options are always a good thing. Jeep® Compass offers a selection of engine and drivetrain combinations, featuring the leading-class nine-speed automatic transmission, all equipped with Stop&Start technology, to match every drivers' path ahead.

The nine-speed automatic transmission gives both power and efficiency when it is needed most.

Launch ratios are perfectly in line with the size, weight and structure of the all-new Jeep® Compass giving the perfect get-up-and-go to start any adventure, whilst shorter ratios in the middle offer seamless transitions into efficiency on the motorway.

Jeep® Compass offers 2.4-litre Tigershark Petrol engine, delivering 129 kW with automatic transmission.

## 9-Speed Automatic Transmission

## 2.4 liter Tigershark Petrol 129 kW

## NO MATTER THE PATH, ALWAYS IN CONTROL.

Not every path in life is the easiest. But Jeep® Compass helps to make it the safest. With 70 available active and passive features, including Forward Collision Warning Plus and Lane Departure Warning Plus standard on all trims, the Jeep® Compass keeps danger at a distance, in any direction: North, East, South and West.

### **Park View Rear Camera**

The rear camera is displayed on the Uconnect touchscreen, creating and adjusting a guide path to follow when reversing.

### **Parallel & Perpendicular Park Assist**

Ultrasonic sensing elements give the Jeep® Compass all the information it needs to literally park itself. Activate the system, sit back and follow the instructions. The systems can also take over when exiting from a parallel space, making that first step on the road so much easier.

### **Rear Cross Path Detection**

Backing up is now a walk in the park. Sounds and icons notify the driver if a vehicle is approaching while the vehicle is in reverse.

### **Blind Spot Monitoring**

A radar system offers an extra set of eyes on the rear blind zones to see when changing lanes or being passed. An icon appears in the side mirror to notify the driver.

### **Forward Collision Warning Plus**

Jeep<sup>®</sup> Compass has your back and your front too, utilizing camera and radars that detect and notify the driver, both audibly and visually, in case of potential collision. If the driver does not react in time, the system automatically brakes the vehicle to avoid or mitigate the impact.

### Lane Departure Warning Plus

A camera reads the lines on the road and avoids risk by notifying the driver when the car is moving outside of either line if the turn indicator is not being used. If the driver does not react in time, the system automatically steers the vehicle to get back in the lane.

### Adaptive Cruise Control

Detects slower traffic ahead while cruise control is activated and adjusts to a safe distance by decelerating and controlled braking, then reverting to the set speed when the street ahead is clear.

## JEEP® ACTIVE DRIVE

### LET INSTINCT DECIDE.

The right tools and technique make any road conquerable, that's why Jeep® equipped the all-new Compass with the 4X4 Jeep® Active Drive system with Rear Axle Disconnect. Jeep® Active Drive is an authentic 4X4 system with power transfer unit and rear drive module that helps make the new Jeep® Compass the most capable compact SUV on the market.

Equipped with Selec-Terrain™ and up to five calibrated settings: Auto, Snow, Mud, Sand and Rock. Each mode has its own algorithm to optimize up to 12 on-board systems and the driver can select the right setting for each terrain, maximising all the Compass' capabilities with a simple twist.

While in Auto mode, the Active Drive system collects and computes data about road conditions, traction, speed and applies them to chassis control and Rear-Axle disconnect system, which switches seamlessly between front-wheel drive and four wheel drive without any driver intervention. The fully variable wet clutch provides the right amount of torque for every condition and automatically disconnects the rear axle when front-wheel drive is sufficient, delivering not only the perfect power, but also greater fuel efficiency.

## SELEC-TERRAIN™

## REAR AXLE DISCONNECT

AUTO SNOW SAND MUD

## PERFECT NATURAL SELECTION.

The road ahead can always be full of surprises, but with the Jeep<sup>®</sup> Compass you can rest assured that whatever the conditions, it's ready to take you further. Change the Selec-Terrain™ settings on-the-fly to match the conditions or allow the Auto mode to do most of the work for you.

### **Auto**

Everyday driving is now ready for everything. Auto mode offers comprehensive coverage for any driving condition, flawlessly connecting and disconnecting with rear-wheel drive to enable maximum control and handling along with maximum efficiency in the blink of an eye.

### **Snow**

Life doesn't stop when it's cold, neither does the Jeep<sup>®</sup> Compass. Switch to Snow mode for full-time four-wheel drive and maximum traction while minimizing oversteering, putting more control and stability where needed most.

### **Mud**

Take some of the dirt out of getting your hands dirty. Switching to Mud mode the four-wheel drive system calibrates itself for maximum low-speed traction and additional wheel slip, giving extra confidence in sticky situations.

### **Sand**

Loose surfaces have met their match. Activate Sand mode for maximum traction and wheel-slip with specially calibrated differentials and transmission ratios on sand covered surfaces.

## REDEFINE YOUR RIDE.

The Jeep® Compass Trailhawk redefines limitless. The Trail Rated® badge shows it's gone through a series of gruelling tests on five categories (Traction, Manoeuvrability, Articulation, Water Fording and Ground Clearance) that prove its off-road capability on some of the toughest trails on the planet: Rubicon and Moab Jeep's proving grounds. Its best in class 4x4 capabilities, 17" off-road tyres, specific front bumper for improved departure angles, increased ride height, skid plates, Jeep® signature red rear tow hook, and available Rock Rails by Mopar® make sure there is no obstacle in the city or wilderness that it can't overcome.

## EVERY ANGLE GIVES AN AWESOME PERSPECTIVE.

Jeep® Compass Trailhawk is equipped with 129 kW 2.4 litre Tigershark petrol engine, nine-speed automatic transmission and 4X4 Jeep® Active Drive Low system adding a selectable low range.

With the additional Rock mode on the Selec-Terrain™ and Jeep® Active Drive Low, Compass knows how to work between a rock and a hard place, putting to work a staggering 20:1 crawl ratio, combined with Hill Descent control. This advanced off-road system facilitates a descent on rough terrain by automatically controlling each wheel's speed, safely bringing you down from your mountain top. So no matter how rocky the road, wide the river or slippery the slope, the Trail Rated Jeep® Compass Trailhawk was built to show you the way.
